Top Skills

Python

R

Microsoft Office

Gregory Watson

Sr. Data Scientist at Thermo Fisher Scientific
Washington DC-Baltimore Area

Summary

Artificial Intelligence | Machine Learning | Data Science

Experience

Thermo Fisher Scientific

Data Scientist

August 2022 - Present (3 years 10 months)

Engineered AI workflows to classify bioproduction products from unstructured product description data

Designed and deployed a lead scoring model that improved lead conversion performance and increased revenue generation

Developed an intelligent web activity model to deliver automated product recommendations and prioritize website visitors by predicted purchase intent

Noblis

Data Scientist

June 2020 - July 2022 (2 years 2 months)

Built sequential pattern detection systems with Deep Learning models that found unusual patterns in access data

Developed and maintained advanced Anomaly Detection systems from beginning to end using Supervised and Unsupervised Learning

Trained and deployed extensive FBprophet time series models to forecast employee weekly activity

Created interactive management tools using Tableau to track team goals and highlight focus areas

Automated complex data transformation processes for Machine Learning models to improve time and efficiency

Hilton

Data Scientist/Analyst (Contractor)

January 2020 - April 2020 (4 months)

Used time series forecasting methods in R to create a forecast for channel booking mixes

Trained and tested various model parameters and selected the highest performing version

Explored the relation between booking trends using regression techniques

Constructed complex SQL queries for production in AWS Redshift and SQL Server databases

Automated processes to create visualizations for future forecasts with Tableau and Microstrategy

Innovated classification algorithms in Python to predict sell out nights with high precision

Merkle

Data Analyst - Marketing Intelligence

August 2018 - January 2020 (1 year 6 months)

Used xgboost modeling techniques that predicted the number of members who would enroll in specific life insurance products

Used SQL, Python, R, Tableau, SAS, and Excel to create visuals of client data that generated insights for marketing purposes

Created dashboards in Tableau that summarized monthly campaign performances and product sales

Answered ad hoc client requests

Project industries included insurance, finance, security, and media

Created consumer profiles based on marketing campaign interaction and personal data

Developed scripts in R, SQL, and Python that automated the cleaning and representation of client data

University of Maryland Baltimore County

Data Science Intern

September 2017 - August 2018 (1 year)

Created a model using decision trees that predicted the probability of a given student enrolling in UMBC

Created an interactive web application using RShiny that showed the changes in student/faculty ratios over time

Performed Regression Analysis on Admission data

Used data visualization techniques in RStudio to highlight a target audience for the UMBC IT Department advisers

Used k-means function to cluster data into local categories based on SAT scores

Presented weekly progress to the VP of IT, Vice President of Admissions, and the Data Science team

Currency Exchange International

Teller

August 2016 - January 2018 (1 year 6 months)

Hanover, Maryland

- Progressed to a management role that entailed acting as a liaison for upper management and focused on asset management
- Executed transactions of over ten thousand dollars and was responsible for accounting over forty thousand dollars on site
- Proficiently utilized MS Office to keep track of metrics and employee schedules

University of Maryland Baltimore County

Finance Board - Vice Chair

July 2016 - July 2017 (1 year 1 month)

Baltimore, Maryland

- Lead a team that worked to properly allocate a budget of \$250,000 for student-life
- Communicated with SGA advisors and the SGA Treasurer to form a budget for student events

Education

University of Maryland Global Campus

Master's degree, Data Analytics · (August 2024)

University of Maryland Baltimore County

Bachelor of Arts (B.A.), Mathematics · (June 2018)
